

ONLINE CASE FILING SYSTEM

A Web Based Platform For Case Filing And Lawyer Hiring

INTRODUCTION

Our project “Online Case Filing System” is basically an online platform where everyone will be able to file the case. With this , the users will get the case related information through their accounts. Case filers will also be able to hire the lawyes..

And we can also track the progress of the court by generating the reports of the cases.

OBJECTIVES

- To provide the facility of Online Case filing.
- To provide a platform from which the case filer will get all the case related information online.
- To provide such a such platform in which there will no restriction of day or time.
- To provide the facility of hiring the lawyer.
- To track the progress of the court by generatin the reports.

FUNCTIONAL REQUIREMENTS

- 1.Filing the case.
- 2.Getting Case Updates
- 3.Hiring the Lawyers.
- 4.Generating Reports

FUTURE WORK

In future, we can expand our Online Case Filing System to the district level.

In future, we can convert this web based Case Filing System to the Android based Case Filing System

CONCLUSION

Online Case Filing System will be very beneficial for the users to file the Cases online and also getting the Case udpates online. It will also help the users for hiring the lawyers. And also it will very beneficial for tracking the progress of the court by generating the reports of the cases.
